

Earth Friendly Cloth

What is SKOY?

SKOY is an eco-friendly household cleaning cloth that outlasts 15 rolls of paper towels. This new approach to cleaning boasts a cloth that is 100% biodegradable, natural, and re-usable. The SKOY cloth has an absorption factor of 15x its own weight, which makes it far superior than any other cloth on the market. SKOY is a durable cloth that is washer and dryer safe, which means it can be used over and over again. This European-made product is non-toxic and utilizes original artwork designs to add fun as well as function to the kitchen or bathroom.

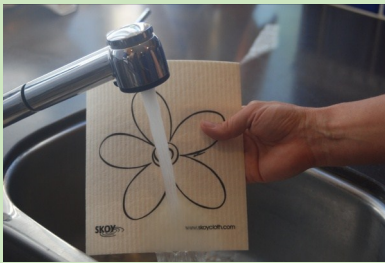

SKOY Story

The story is quite simple really. In 2007 Michelle and Karen had a desire to share a cloth that is better than any cloth they have ever used. The bonus being that it is environmentally friendly! They

started to do a little research and were surprised to see how people were cleaning their kitchens. They were even more shocked to find out how many tons of paper towels were being used annually (approx. 2.5 million tons) and overloading the landfills. They decided to do something about it...

- One Skoy cloth saves 15 rolls of paper towels
- Use instead of paper towels and sponges
 - 100% biodegradable & compostable
 - Reusable and machine washable
 - Absorbs 15x its own weight
