

Earth Friendly Cloth

SKOYTM

Wet
Wipe
Wow

- Use instead of Paper Towels & Sponges
- One SKOY cloth saves 15 rolls of paper towels
- 100% biodegradable and natural
- Reusable and machine washable
- Absorbs 15 times its own weight

SKOY is an environmental advance in cleaning cloths. This European made product is 100% biodegradable and is made from a unique blend of natural cotton and wood-pulp cellulose. SKOY cloth is non-toxic, chlorine-free and made using water-based colors and inks. SKOY utilizes original artwork designs to add fun as well as function to your home.

SKOY cloth is a reusable product due to its amazing durability. Using one SKOY cloth is the equivalent to using 15 rolls of paper towels in an average home. With the high cost of paper towels, SKOY cloth is the obvious choice for your wallet and the environment.

Use & Care

Wet your SKOY cloth before using. Be sure to squeeze out the excess water for optimal absorption. SKOY can be used with popular household cleaners, but works just as well with water.

SKOY cloth can be cleaned in your dishwasher and is washer/dryer safe. Chlorine use is not recommended. Another option to keep your cloth healthy and germ-free is to microwave it wet for 1-2 minutes.

Caution: SKOY cloth must be wet when microwaving. Please wait a minute or two before removing cloth from microwave, as it will be extremely hot.

Wet SKOY cloth before use

Squeeze out excess water for optimal absorption
